PROFILE SUMMARY

Cloud/DevOps Engineer with over 7+ years of experience in IT, With 6 years of experience in Cloud, DevOps for designing and operating scalable AWS infrastructure and cloud-native platforms. Expert in Kubernetes (EKS), Terraform, CI/CD automation (Jenkins, ArgoCD, GitHub Actions), observability (Prometheus, Grafana, Loki) and Linux administration. Proven record of reducing deployment time and MTTR, delivering zero-downtime rollouts, optimizing costs, and maintaining 99.99% availability. Hands-on experience building local LLM inference environments using Ollama for AI/LLM workflows. Seeking a DevOps role in a product-based company to build scalable, automated, and reliable engineering platforms.

SKILLS

CI/CD & SCM: Jenkins, GitLab CI/CD, GitHub Actions, Maven, Nexus, SonarQube, Git

Containers: Docker, Kubernetes (K8s), Helm, Docker Compose

IaC & Config Mgmt: Terraform, CloudFormation, Ansible

Cloud – AWS: EC2, S3, VPC, ELB, Auto Scaling, Route 53, Lambda, CloudWatch, IAM, EKS

Scripting: Python, Bash, YAML

Monitoring: Prometheus, Grafana, CloudWatch

Operating Systems: Linux – CentOS, Ubuntu

WORK EXPERIENCE

Linux Administartor/DevOps Engineer 03/2024 – Present | Pune

Ewaycorp Technologies Pvt Ltd

- Architected and operated AWS infrastructure (EC2, S3, RDS, VPC, EBS, EFS, ELB, WAF, ACM) supporting multiple environments (DEV, QA, PPD, PRD) in coordination with development and QA teams.
- Automated infrastructure provisioning using Terraform and CloudFormation, reducing deployment times by 60%.
- Engineered Jenkins and ArgoCD/GitOps CI/CD pipelines enabling canary, blue-green, rollback, and zero-downtime deployments, reducing release cycles by 50%.
- Led Amazon EKS deploy microservices using Helm enabling safe blue-green/canary rollouts and ensuring zero downtime.
- Administered Kubernetes workloads and automated certificate renewals, backup verifications, and log rotations using Python and Bash.
- Hardened platform security through RBAC, network policies, container image scanning, and OWASP ZAP automated vulnerability remediation.
- Delivered 24x7 on-call support and incident response to maintain 99.99% platform availability.
- Built local AI inference environments using Ollama to deploy and optimize open-source LLMs (Qwen, DeepSeek) for efficient model serving and evaluation.

System Administartor/DevOps Engineer 02/2019 – 07/2023

Skylex Technologies Pvt Ltd

- Administered and optimized AWS cloud infrastructure (EC2, ELB, EBS, S3, RDS, VPC, Route 53) ensuring secure, high-availability environments.
- Automated provisioning of 3000+ Linux servers using Ansible, standardizing environments across teams.

- Provisioned and optimized Kubernetes clusters, namespaces, and load balancers on AWS using Terraform and Helm, supporting a 40% capacity increase.
- Enhanced CI/CD automation for containerized builds and deployments, improving release efficiency by 45% and auto-terminating long-running jobs.
- Automated ETCD health checks and stale job cleanup via Bash, reducing operational overhead by 50%.
- Deployed monitoring stack (CloudWatch, Prometheus, Grafana) and resolved Kubernetes cluster issues across DEV, QAS, PRD, PPD environments.
- Optimized infrastructure costs by 20% through autoscaling and EC2 rightsizing without impacting performance.

Backup Support Engineer / Linux 01/2018 – 08/2018

Aforeserve

- Administered RHEL/Windows servers, managed system services (Apache, NGINX, MySQL) and performed security patching, LVM/disk management, and automated backups.
- Executed OS administration, troubleshooting, and performance monitoring; automated administrative tasks via shell scripts (Bash).
- Managed backup solutions (HP Data Protector), cron jobs, and restoration processes to ensure data integrity and availability.

PROJECTS

Automated Cloud Infrastructure Provisioning

Ewaycorp Technologies Client:Ruland

- Led Infrastructure as Code development using Terraform to provision scalable AWS infrastructure (VPC, subnets, EC2, S3, IAM, ALB, EKS).
- Created Ansible playbooks for automated configuration management and integrated CI/CD with Jenkins to automate deployments.
- Provisioned and configured ALBs, target groups, security groups, NAT Gateways, and CloudFront distributions to build secure, highly available architectures.
- Reduced infrastructure provisioning time from days to under 30 minutes
- Implemented CloudWatch dashboards and SNS-based alerts for proactive monitoring

Web Application Deployment on AWS EKS

Ewaycorp Technologies Client:Ruland

- Deployed a three-tier web application on AWS EKS using ReactJS, NodeJS, and MongoDB; automated infrastructure provisioning with Terraform and AWS CLI.
- Designed Jenkins-based pipelines integrated with Git, Maven, SonarQube, and Nexus for automated build, test, and deploy
- Reduced deployment failures and improved release cycle speed by 35%
- Managed multi-node Kubernetes cluster with rolling updates, rollback strategies, and RBAC-based access control
- Deployed 15+ microservices using Helm charts with environment-specific configurations
- Ensured high availability and reduced time-to-market via automated deployments and monitoring integrations.

AI-Powered Autonomous Monitoring System (Kubernetes & LLM)

Proof of Concept (PoC)

- Designed and implemented a centralized logging pipeline using Loki and Promtail on a Kind Kubernetes cluster for centralized log ingestion.
- Developed a FastAPI service integrating Llama 3 and Groq LLMs to automate Root Cause Analysis and generate code-level remediation suggestions.
- Implemented automated error detection for Spring Boot and PHP microservices to provide immediate remediation guidance.
- Reduced potential MTTR by automating identification of common runtime exceptions such as NPEs and SQL errors.

CERTIFICATIONS

Certified Kubernetes Administrator (CKA): Valid upto August 2027

AWS Certified Solutions Architect professional: Valid upto November 2027

AWS Certified Solutions Architect Associate: Valid upto October 2027

RHCSA: Valid upto November 2020

Python (Basic) Certificate

EDUCATION

B.Tech / B.E. | Information Technology Engineering (ITE) 2012 – 2017 | Khed, Maharashtra
Mumbai University / Gharda Foundation's Gharda Institute of Technology
CGPI 6.5/10

12th 2011 – 2012 | Chiplun, Maharashtra
NES Jr College, Sati-Chinchghari
Marks 51%

10th 2009 – 2010 | Chiplun, Maharashtra
United English School
Marks 78%

EXTRA-CURRICULAR ACTIVITIES

Technical Writing
Authored technical blog posts on DevOps practices, CI/CD automation, and observability to share knowledge and best practices with the engineering community.
